How innovation is shaping the future

About the Company

- Vision Future Technology (VFT) specializes in designing and implementing advanced software solutions and AI-powered platforms. Our team of experts in software development, artificial intelligence, and data analytics helps organizations and healthcare centers automate processes, optimize workflows, and make data-driven decisions through intelligent applications, AI chatbots, and custom software solutions.
- In addition, VFT provides intelligent building solutions, IoT systems, and building automation (BMS) services. Our electrical engineering and smart systems team focuses on energy efficiency, safety, security monitoring, and creating fully automated and intelligent environments for organizations and facilities.

Our Mission and Vision

Our Mission

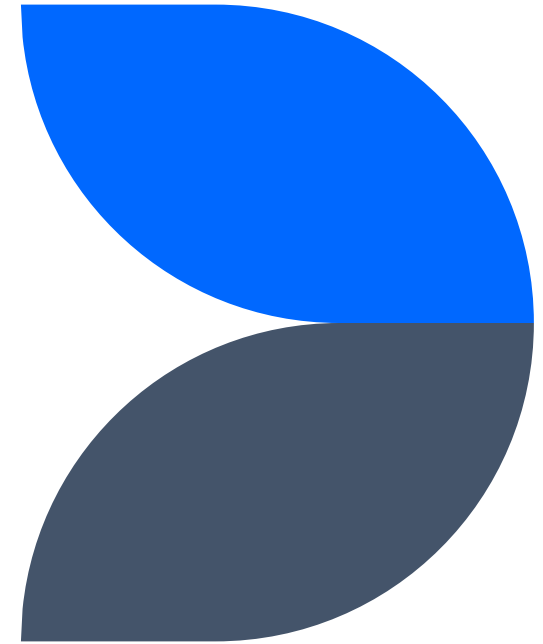

- Empowering organizations and facilities with intelligent software, AI, and IoT solutions to optimize operations, enhance efficiency, and improve safety and service quality.

Our Vision

- Creating smarter, safer, and fully automated environments where technology and humans work seamlessly together across buildings, operations, and organizational processes.

Our Goals

Our goal is to shape a future where organizations and facilities operate smarter, safer, and more efficiently, leveraging AI, IoT, and intelligent software for faster and more accurate decision-making.

Our Goals

➤ **Develop innovative AI, IoT, and smart building solutions**

- Deliver intelligent software, building automation, and IoT systems for organizations and facilities.

➤ **Enhance operational efficiency and optimize processes**

- Help organizations reduce time, cost, and errors through automation, smart workflows, and data-driven decision-making.

➤ **Improve workplace safety and facility security**

- Utilize AI-powered monitoring, computer vision, HSE systems, and smart building solutions for safer environments.

➤ **Enhance user, employee, and occupant experience**

- Create fast, intuitive, and intelligent experiences for staff, residents, and facility users.

➤ **Empower organizational knowledge and insight**

- Provide AI chatbots, dashboards, and knowledge management systems for quick access to information and smarter decision-making.

➤ **Lead in AI, IoT, and smart technology innovation**

- Apply the latest technologies to deliver competitive, practical, and integrated solutions for organizations and smart facilities.

Our Market

VFT Focus:

Vision Future Technology (VFT) targets the **AI, IoT, and smart building markets** globally and across the Middle East, providing innovative solutions that capitalize on this rapid growth and demand for intelligent, automated, and data-driven systems.

1. Global Artificial Intelligence (AI) Market – 2025

- Global Market Size (2025): approximately **\$757.58 billion**
- Forecasted Annual Growth Rate (CAGR): around **19.2%** from **2025 to 2034**
- Projected Market Size (2034): over **\$3.6 trillion**
- Largest Market in **2024**: North America with **32.93%** share of the global market
- Fastest Growing Region: Asia-Pacific with the highest growth rate compared to other regions

Middle East & Africa (MEA) AI Market – 2025

- Market Size (2025): approximately **\$35.53 billion**
- Forecasted Annual Growth Rate (CAGR): around **32.7%** from **2025 to 2032**
- Projected Market Size (2032): over **\$256.92 billion**
- Largest Segment: Services with the highest revenue share in **2024**
- Fastest Growing Segment: Services, showing the highest growth rate during the forecast period

Our Management Team

CEO & Managing Director

Our Offered Services

Vision Future Technology (VFT) provides intelligent solutions using AI, IoT, and smart building technologies. Our services cover building automation, IoT integration, smart facility management, software platforms, and AI-powered applications. We aim to optimize operations, enhance safety and security, and deliver seamless, data-driven, and intelligent experiences.

- Consulting & Integration Services
- Healthcare & Hospital Solutions
- Human Resources & Talent Management
- Smart Building & Electrical Systems
- AI & Software Solutions
- Building Management System (BMS)
- Predictive Maintenance & Energy Optimization
- Smart Dashboard for Facility Monitoring & Analytics

Solutions We Offer

Smart Solutions for Hospitals and Healthcare

VFT focuses on digitalizing clinical and managerial processes by developing a suite of intelligent tools and software for hospitals, clinics, and healthcare centers.

- Comprehensive Hospital Information System (HIS)
- Electronic Health Records (EHR) management
- Intelligent patient history taking using speech recognition and NLP
- Smart drug interaction detection system
- Hospital AI chatbot and virtual assistant for patient services
- Machine vision for patient monitoring, security, and environment control
- Real-time health data analytics dashboard
- Patient flow prediction and workload analysis
- Smart of critical facility systems

•building solutions for healthcare facilities including:

- Clean room automation and monitoring
- HVAC and air quality control
- Energy management and optimization
- IoT-enabled lighting and environmental monitoring
- Safety and HSE compliance monitoring
- Access control and unauthorized entry detection
- Fire, smoke, and hazard detection systems
- Predictive maintenance

 Result: Reduced human error, accelerated clinical decision-making, optimized costs, and enhanced patient experience.

Solutions We Offer

Smart Workforce Management Using Surveillance Cameras

This software utilizes computer vision and deep learning technologies to automatically and accurately monitor and analyze employee attendance, behavior, and productivity.

Features:

- **Intelligent attendance logging** using facial recognition
- **Behavioral and activity analysis** of staff
- **Real-time alerts** for violations, absenteeism, or abnormal behaviors
- **Analytical reporting** for HR and management teams
- **Full data privacy** with on-premise processing

 **Outcome:** Enhanced workforce management, higher productivity, and improved organizational discipline.

Solutions We Offer

AI-Powered Talent Acquisition Platform

This platform enables organizations to make faster and more accurate hiring decisions by leveraging artificial intelligence and advanced analytics.

Capabilities:

- **Automated resume analysis and ranking** based on skills and job fit
- **Initial interviews** conducted via an intelligent AI chatbot
- **Personality and behavioral assessment** of candidates using NLP
- **Best candidate recommendation** for each role
- **Seamless integration** with existing HRM systems

 **Outcome:** Reduced recruitment time, improved selection accuracy, and effective identification of top talent.

Solutions We Offer

AI Knowledge-based Chatbot

This product leverages advanced language models and a dedicated knowledge base to deliver a truly intelligent assistant for interacting with users, clients, or staff.

Capabilities:

- **Training the chatbot** with documents, FAQs, and internal organizational data
- **Providing accurate and personalized responses** to user queries
- **Multi-platform deployment** across websites, portals, and mobile apps
- **Multilingual support** (English, Arabic, Persian)
- **Conversation analytics and knowledge extraction** for continuous improvement

 **Outcome:** Faster responses, reduced workload for support teams, and an enhanced user and client experience.

Flexible Customization & Client-Centric Development

At **Vision Future Technology (VFT)**, we understand that every organization has unique needs and operational processes.

That's why all our systems and solutions are **fully customizable** based on client requirements — from workflow design and feature development to branding and integration with existing infrastructure.

Our Commitment: We tailor every project to align perfectly with your goals, ensuring seamless implementation and maximum value.

Thank you
